# 1 Basis for Utility Allowance – Section 8

This utility allowance study for the Section 8 tenant-based assistance: housing choice voucher program conforms to 24CFR982.517 which follows:

982.517 Utility allowance schedule.

(a) *Maintaining schedule.* (1) The PHA must maintain a utility allowance schedule for all tenant-paid utilities (except telephone), for cost of tenant supplied refrigerators and ranges, and for other tenant-paid housing services (e.g., trash collection (disposal of waste and refuse)). (2) The PHA must give HUD a copy of the utility allowance schedule. At HUD's request, the PHA also must provide any information or procedures used in preparation of the schedule.

(b) *How allowances are determined.* (1) The utility allowance schedule must be determined based on the typical cost of utilities and services paid by energy conservative households that occupy housing of similar size and type in the same locality. In developing the schedule, the PHA must use normal patterns of consumption for the community as a whole and current utility rates. (2)(i) a PHA's utility allowance schedule, and the utility allowance for an individual family, must include the utilities and services that are necessary in the locality to provide housing that complies with the housing quality standards. However, the PHA may not provide any allowance for non-essential utility costs, such as costs of cable or satellite television. (ii) In the utility allowance schedule, the PHA must classify utilities and other housing services according to the following general categories: space heating; air conditioning; cooking; water heating; water; sewer; trash collection (disposal of waste and refuse); other electric; refrigerator (cost of tenant- supplied refrigerator); range (cost of tenant-supplied range); and other specified housing services. The PHA must provide a utility allowance for tenant-paid air-conditioning costs if the majority of housing units in the market provide centrally air-conditioned units or there is appropriate wiring for tenant-installed air conditioners. (3) The cost of each utility and housing service category must be stated separately. For each of these categories, the utility allowance schedule must take into consideration unit size (by number of bedrooms), and unit types (e.g., apartment, row-house, townhouse, single-family detached, and manufactured housing) that are typical in the community. (4) The utility allowance schedule must be prepared and submitted in accordance with HUD requirements on the form prescribed by HUD.

(c) *Revisions of utility allowance schedule.* (1) a PHA must review its schedule of utility allowances each year, and must revise its allowance for a utility category if there PHAs been a change of 10 percent or more in the utility rate since the last time the utility allowance schedule was revised. The PHA must maintain information supporting its annual review of utility allowances and any revisions made in its utility allowance schedule. (2) At HUD's direction, the PHA must revise the utility allowance schedule to correct any errors, or as necessary to update the schedule.

(d) *Use of utility allowance schedule.* (1) The PHA must use the appropriate utility allowance for the size of dwelling unit actually leased by the family (rather than the family unit size as determined under the PHA subsidy standards). (2) At reexamination, the PHA must use the PHA current utility allowance schedule.

(e) *Higher utility allowance as reasonable accommodation for a person with disabilities.* On request from a family that includes a person with disabilities, the PHA must approve a utility allowance which is higher than the applicable amount on the utility allowance schedule if a higher utility allowance is needed as a reasonable accommodation in accordance with 24 CFR part 8 to make the program accessible to and usable by the family member with a disability.

## 2 Introduction

The The Housing Authority of the City of Fort Myers provides vouchers for zero through five bedroom units in a variety of configurations including mobile homes, single family homes, duplexes, townhouses and multi-story, multi-family units. Each unit within each type can vary in age, size and configuration.

This Utility Allowance Study was performed for the purpose of complying with Federal Register 24 CFR Part 982. These regulations apply to allowances for all applicable types of utilities, regardless on the methodology used to calculate the allowances.

The study was performed with the assistance of the Utility Allowance Guidebook 7420.10G. This study uses the engineering-based methodology, one of two suggested methods that can be used to establish utility allowances. This method is based on engineering calculations and other technical information that is used to estimate the amount of energy or water a household should reasonable require.

The tenants are responsible for individual metered electric, natural gas, bottled gas (propane), water and sanitary sewer utilities. The tenants can also be responsible for non-metered utility services, such as trash collection.

The age and configuration of unit only has a significant effect on heating and air conditioning. Typical configurations of mobile homes, single family homes, duplexes, low rise / townhouses and multi-story, multi-family are used to estimate these costs. Considerations for allowances such as cooking, lighting and water consumption are typical to the same number of bedrooms and average occupancy. These allowances were developed for each number of bedrooms, zero through five and are based on a typical unit.

#### 4.1.1 Electric Rates

Glades Electric Cooperative serves Highlands County. Glades Electric Cooperative rates can be found at [www.gladesec.com](http://www.gladesec.com) Glades Electric Cooperative rates are as follows:

Customer Charge:	\$46.15
Energy Charge (First 1,000kWh) =	\$0.11487
Energy Charge (All additional kWh) =	\$0.15333

FPL serves Highlands County. FPL rates can be found at [www.fpl.com](http://www.fpl.com) FPL rates are as follows:

Customer Charge:	\$10.70
Energy Charge (First 1,000kWh) =	\$0.13588
Energy Charge (All additional kWh) =	\$0.15733

Duke Energy serves Highlands County. Duke Energy rates can be found at [www.duke-energy.com](http://www.duke-energy.com) Duke Energy rates are as follows:

Customer Charge:	\$14.11
Energy Charge (First 1,000kWh) =	\$0.16967
Energy Charge (All additional kWh) =	\$0.18177

A consolidated rates of the three utilities are as follows:

Customer Charge:	\$23.65
Energy Charge (First 1,000kWh) =	\$0.14014
Energy Charge (All additional kWh) =	\$0.16414

Three, Four and Five bedroom units use more than 1,000 kWh/month if all electric appliances are used. Therefore, the following allowances were calculated using the higher electric rate:

- 3, 4 & 5 Bedroom - Oxygen Concentrator
- 4 & 5 Bedroom - Water Heating
- 5 Bedroom - Cooking

#### 4.6 Trash Collection

##### Avon Park & Crystal Lake Only

Monthly Trash Collection Cost	0 BR	1 BR	2 BR	3 BR	4 BR	5 BR
Total Trash Collection	\$14.50	\$14.50	\$14.50	\$14.50	\$14.50	\$14.50

#### 4.6.1 Trash Collection Rates

Trash collection is collected on the tax bills for City of Sebring and Town of Lake Placid. Trash is on the utility bills for Avon Park only.

Avon Park Trash Charge (\$/month): \$15.00  
 Crystal Lake Trash Charge (\$/month): \$14.00

#### 4.7 Appliance Depreciation Allowance

Should the tenant provide their own range or refrigerator, the Housing Authority is required to reimburse the tenant for the cost of the appliance(s) over the life of the appliance. The following schedule provides the monthly allowance for providing their personal range and/or stove.

##### Appliance Allowance

Appliance	Estimated Cost	Expectant Life (Yrs)	Monthly Allowance
Range	\$683	10	\$6
Refrigerator	\$775	10	\$6

## 5 Consumption Studies

### 5.1 Space Heating Consumption

The following monthly energy consumption is based on the methodology recommended in the Utility Allowance Guidebook:

Design Outdoor Air Temperature (F):	42
Design Indoor Air Temperature (F):	72
Heating Degree Days:	418
Heat of Electricity (BTU/kWh)	3,412
Heat Pump COP	2.6
Furnace Efficiency:	70%
Heat of Propane (BTU/gal)	91,000
Heat of Natural Gas (BTU/Therm)	100,000

#### Monthly Energy Consumption Requirements for Heating (Mobile Home)

Natural Gas (Therms)	4	5.6	8.1	8.8	11.2	12.8

### 5.3 Lighting and Refrigeration Consumption

The following is the monthly energy consumption requirements for lighting and refrigeration as recommended in the Utility Allowance Guidebook:

#### Monthly Energy Consumption Requirements for Lighting and Refrigeration

Refrigeration	0 BR	1 BR	2 BR	3 BR	4 BR	5 BR
Electricity (kWh)	125	175	225	264	350	400

### 5.4 Air Conditioning Consumption

The following monthly energy consumption requirements for air conditioning consumption are based on calculations in HUD's Life Cycle Cost Analysis Handbook 7418.1 CHG-1. The calculations assume the following:

Unit Efficiency (BTU/Watt)	9.7
Equivalent Full Load Hours	1700

#### Monthly Energy Consumption Requirements for Air Conditioning (Mobile Home)

Air Conditioning	0 BR	1 BR	2 BR	3 BR	4 BR	5 BR
Design Load (BTU/hr)	9,783	11,428	12,399	16,214	19,278	26,302
